# Karlton Hall M.

## Industrial Design Engineer

Hi! I'm a 25 years old Costa Rican designer with more than **7 years of experience** at solving end-user design needs by taking a close look, being open to learn, and working collaboratively to achieve the best result possible.

I could describe myself as a responsible person, used to working under pressure, goal-oriented, and not afraid of taking the lead when the time is needed.

**To sum up**, we could say that I'm a creative, sporty, and really into geeky stuff person, always looking for ways to solve problems in the most efficient way.
